SISSONS TERMITE TREATMENT & WOOD PRESERVATIVE

PRODUCT DESCRIPTION: Based on a synthetic pyrethroid derivative to give maximum protection against termite, wood boring insects and wood decay agents.

RECOMMENDED TYPICAL USES: Suitable for the preservation of all interior and exterior wooden substrates

ADVANTAGES:

1. Fast Penetrating.
2. Good Penetration.
3. Long residual effect.
4. Easy to apply.

DIRECTIONS FOR USE: Exposed wooden surfaces should be bare and free from anything that would hinder penetration of the product, e.g. paint, grease, oils etc. Surfaces can be treated by spray, brush or dipping application. The type of wood will determine the level of porosity hence it may be necessary to repeat application for certain types of lumber (e.g. teak, mahogany, pitch pine etc) to ensure adequate protection.

PRECAUTIONS: Skin and eye irritant.

Ensure there is adequate ventilation

Wear suitable protection when using.

Do not eat, drink or smoke during application.

Cover all water source before application. Avoid all contact with aquatic and plant life.

ACTIVE INGREDIENT: Contains Pyrethroid a special chemical class of active ingredients found many of the modern insecticides.

TECHNICAL DATA

PRODUCT REF: STT SERIES

GENERIC TYPE: Cypermethrin Based

COLOUR: Clear

PACK SIZES: ¼ US and 1 US Gallon

SPREADING RATE: 150-200 sq. ft. per US Gallon depending on the porosity of the substrate

FLASH POINT: 113 oF or 45oC

DRYING TIMES: 15-30 minutes depending on the external environment.

APPLICATION METHODS: Brush, spray or by immersion.

THINNER/CLEAN UP: Sissons Paint Thinners

SOLIDS BY WEIGHT: Active ingredient: 2.1% (Max).

SOLIDS BY VOLUME: N/A

V.O.C.: 691gm / litre
